

DIY Glass Gem Magnet Instructions

To make your gem magnets, follow these simple instructions:

1. Make sure you have everything you need:

- clear gems with flat bottoms
- scrapbooking paper or fancy cardstock
- Mod Podge
- round magnets with adhesive backs
- pencil
- scissors

2. Cover your work surface to protect it from the Mod Podge.

3. Place a clear gem on the scrapbook paper right over the design you want to show on the gem.

4. Use the pencil to trace the form of the gem.

5. After you've traced around the gem, cut out the form with your scissors.

6. Apply a coat of Mod Podge to the bottom (flat side) of the gem.

7. Place the paper form onto the gem so the design shows from the top of the gem.

8. Apply a layer of Mod Podge over the paper form and let it dry.

9. Remove the backing from the magnet and adhere to the back of the gem.

10. You're done!
